

Point 6.1.: "System will use dedicated network structured by the Contractor. The Contractor will provide and configure all network constituents."

Q.1: If the existing PANSAs facilities are used, will PANSAs allow use of the telecommunications infrastructure for communication between the facilities? (Ethernet links with parameters required by the WAM system).

**A.1 : No. If the existing PANSAs facilities are used, PANSAs will allow only use of infrastructure like masts, buildings, shelters etc. The telecommunication infrastructure shall be provided by the Contractor.**

Q.2: Is it possible to receive data from PANSAs, such as telecommunications data transfer capabilities between existing facilities in the area designated for the construction of the WAM system?

**A.2 : The information is out of the scope of the RFI and not relevant, taking into account A.1.**

Point 6.2.: "Data links between Ground Units and Central Processor Unit will be provided by Contractor for the period up to minimum one year after successfully complete final SAT."

Q.3 : Does this mean that the Contractor will be obliged to sign an agreement on his own behalf with any operator / administrator of the network for the provision of data transmission lines, with parameters required by the WAM system?

**A.3 Yes, in case of data transmission lines not owned by the Contractor**

Q.4: Does this mean that the Contractor will be obliged to sign a contract on behalf of PANSAs with any / indicated operator / network administrator for the provision of data transmission lines, with parameters required by the WAM system?

**A.4. No. PANSAs will not indicate any operator and will not require any contract with network operator on behalf of PANSAs. The data link provision for the indicated period will be obligations included in the WAM contract.**

Q.5: Will PANSAs provide communication between OKRL Poznań and OKRL Wrocław?

**A.5 Yes, PANSAs will provide communication between OKRL Poznań and OKRL Wrocław**
